

Maria Hasan

Student

PROFILE

Dedicated and motivated Computer Science Engineering (CSE) student with a passion for technology and a strong foundation in programming and problem-solving skills. Adept at applying theoretical knowledge to practical situations and seeking opportunities to expand technical skills. I want to make myself prepare for the next generation technology like blockchain, web3 and artificial intelligence and machine learning. As I have 2 years experience on managing proprietary trading firms fund, along with financial market chart analysis skills, I'm hoping that my journey on learning data analysis can help me to make better performance in both academics and professional aspects.
